## “Break the rules...or not”

### Rebels seize power

The world is divided into two kinds of people : those who follow the rules and those who go beyond them. Choose which side you're on !

The rules of the game are simple : obey and disobey. The watch word : concentration. Your worst enemy: your own self !

On a lively music, the levels follow on, the instructions unfold , the time narrows, heartbeat grows more intense and the first hesitations start.

In order not to fail, only one solution : excel yourself!

Only the weak gives up, what about you?

### The more you play, the more you need it !

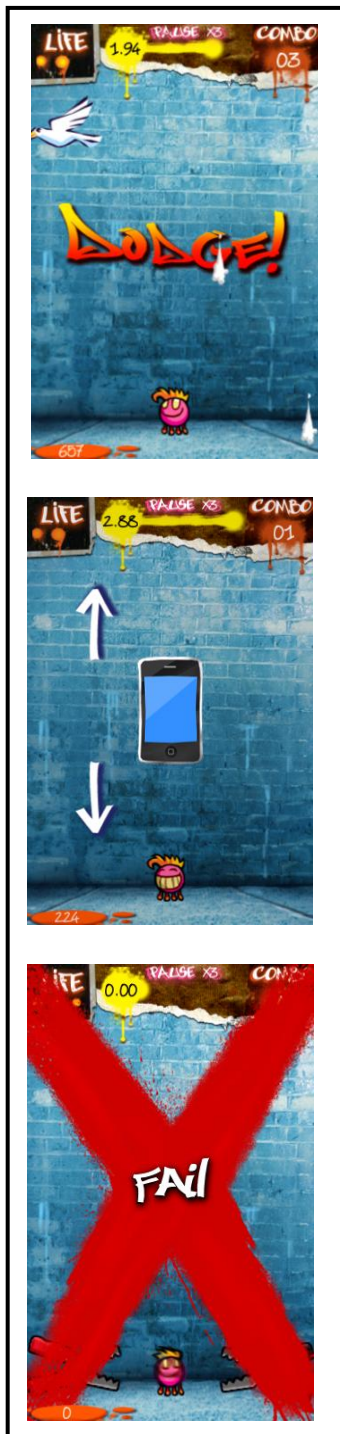

Now, you think you can master it. Your reflexes are improving. But where do you place yourself in relation to everyone else around ? Enjoy your victory or accept your failure as the world ranking goes on. With Break the Rules and score sharing on Facebook, no one is safe from triumph... nor defeat.

Excessive use of “**Break the rules**” can be addictive !

« By virtue of its easiness to use, being accessible with the greatest of ease and thanks to the very foundations of the game based on managing the stress, “**Break the rules**” is in absolute accordance with its platform », points out Nicolas Bensignor, co-founder and president of Playsoft. « We confirm our wish to put at iPhone users' disposal a simple and pleasant game. Our priority is to offer original games, accessible and high-standard in order to be a party to memorable moments. »
